

Sales Invoicing Flow Chart

SALES MANAGEMENT INFORMATION SYSTEM (SMIS)

Working Process and Process Flow

Working Process

1. Review of Existing Live Application

- **Identify what currently exists in the live application**
 - List of all menus and operations
 - Documentation of all manual processes

2. Identify Additional Requirements

- **Gather new requirements**
 - Define the scope of additional features or enhancements

3. Compare Live App and Development App

- **Step-by-step comparison**
 - List down all menus in both live and development apps
 - Compare functionalities: Live vs Dev
 - Check whether the development version fulfills the required features
- **Assessment**
 - If the development version does not meet the requirement:
 - Mark it as incomplete
 - Estimate the time required to complete the remaining development

Note: All times are approximate and may vary.

Upcoming Project:

1. **Ruling Forecast (ROFO).**
2. **Production Planning and Inventory Control (PPIC).**
3. **Supply Chain Management (SCM).**
4. **Warehouse (WHRP).**
5. **Finished Goods Store (FGS).**
6. **Central Store (CS).**
